BUILT FOR VBOOKING TEAMS

Less admin. More room for your guests.

Your AI workspace for Vbooking operations and multilingual customer assistance.

ONE WORKSPACE. FROM REQUEST TO RESULT.

> “Find the latest booking and prepare an operations summary for my team.”

01

Find

Read the relevant booking details.

02

Prepare

Turn information into useful work.

03

Review

Check the result before the next step.

ILLUSTRATIVE WORKFLOW

For tour operators and travel businesses working in Vbooking.

NUSKU CORE

Put everyday Vbooking work into words.

Ask for the outcome you need. Nusku brings together booking tools, page controls and reporting in one desktop workspace.

01

Bookings, found faster

Search by booking reference, guest, phone, product or date. Find the latest booking or a specific place in the booking order.

02

Guest details, organised

Read available traveller and contact details, then prepare clear information for the people delivering the experience.

03

Product work, simplified

Open package forms, read validation messages and prepare changes to supported fields for review.

04

Reports, ready to share

Group bookings by tour and turn operational information into Excel files, PDF reports or team summaries.

A PRACTICAL REQUEST

“List tomorrow’s bookings by tour, show the guest totals and create an Excel file.”

INCLUDED IN NUSKU COMPLETE

Keep the conversation moving.

Prepare relevant replies using conversation history, product information and the guidance your business provides.

ILLUSTRATIVE CONVERSATION

Guest: “Can you send me the booking link for the tour we discussed?”

Nusku prepares:
A reply using the conversation context, with a relevant product or booking QR suggestion for your review.

01

Reply across languages

Draft in the guest’s language, with Turkish translations available for the operator.

02

Remember the context

Keep useful customer details such as booking reference, date, group size and hotel.

Your team stays involved. Review and edit drafts before sending. Questions that need a business decision can be flagged for operator attention.
